

The **Texas Council on Alzheimer's Disease and Related Disorders** is charged with oversight of state appropriations to the

**Texas Alzheimer's Research and Care Consortium**

. The Council's mission is to advocate for statewide coordinated research and increased research funding to benefit persons with Alzheimer's disease and related disorders. The Council also is a source of information on services for persons with Alzheimer's disease offered by state agencies, medical and academic communities, and advocacy associations.

The Council has assembled and maintains a broad array of stakeholders to assist in drafting goals and strategies to meet the needs of Texas' growing number of Alzheimer's patients and their caretakers, through [statewide strategic planning](#) .
